

COURSE SCHEDULE

Tuesday March 6

8:30 am - 12:00 pm

Irrigation System Troubleshooting

Packed full of practical insights, this hands-on course covers everything from electrical basics to using a digital multimeter to using wire tracing and ground-fault location equipment. You will learn the best methods and techniques of efficiently testing and isolating wire faults, bad solenoids and controller problems. (Limited to 20)

12:00 pm - 1:30 pm

LUNCH

1:30 pm - 3:00 pm

Irrigation System Troubleshooting (Continued)

Wednesday March 7

8:30 am - 12:00 pm

Maximizing Profits by Utilizing Smart Controllers and Remote Access Technology -Bill Savelle, Weathermatic

With fuel costs approaching \$4.00 per gallon, now is the time to look at how "Smart Irrigation Controllers" and remote access technology can reduce your maintenance costs and increase your profits. This class will feature Weathermatic's new Smart-Link technology and their Smart Line controllers.

12:00 pm - 1:30 pm

LUNCH

Wednesday March 7

1:30 pm - 5:00 pm

Utilizing L.E.D.'s in Landscape Lighting -Len Thomason, Advantage Light Source

L.E.D. technology has improved greatly in the last few years. This course will discuss the advantages of L.E.D. lighting technology compared to conventional incandescent systems. Design benefits, power consumption, wire and transformer sizing, retrofit applications, and other factors will be discussed. (Lunch will **NOT** be provided)

Wednesday March 14

8:30 am - 12:00 pm

Savio Water Feature Institute - Pond Build -Rick Bartel, Industry Veteran and Author of *The R.I.S.E. Method*

W. P. Law, Inc. is proud to host this Savio Water Feature Institute seminar conducted by industry veteran and author Rick Bartel. Rick is a noted industry expert with over twenty years-experience designing and installing water features. His early passion to advance water feature installations to the next level of proficiency led him to develop the now well-known and industry respected R.I.S.E. Method. This **R**andom, **I**rregular, **S**pontaneous, and **E**rratic Method has been credited with receiving more than 1500 national and international awards. Rick has also been featured on Extreme Landscapes and the DIY Network's Waterscapes Workshop.

12:00 pm - 1:30 pm

LUNCH

1:30 pm - 5:00 pm

Savio Water Feature Institute - Pond Build (Continued)

The SWFI seminar reinforces classroom instruction with a real get-your-hands-dirty water feature installation. Topics covered include:

- Savio Product Introduction
- Introduction to the Water Feature Industry
- Finding and Establishing a Client Base
- Types of Water Features and Their Intended Use
- Proper Site Selection
- Planning and Designing the Correct System for your Client
- Excavation Procedures and Techniques
- Underlayment and Liner Placement
- Proper Selection of Savio Components
- Proper Installation of Savio Components
- Mechanical Filtration Issues
- Biological Filtration Issues
- Springflo Filter Media
- UVinex Ultra-violet Sterilization Units
- Plumbing and the Laws of Fluid Hydraulics
- Proper Pump Selection
- Rock and Boulder Selection
- RISE Method Rock and Boulder Placement Techniques
- Water Control with Savio Black Foam Applications
- Safety Issues and Concerns
- Underwater Lighting Options
- Water Level Sensors
- Water Treatment Options
- Aquatics Plant Guidelines
- Terrestrial Plant Guidelines
- Naturalistic Waterfall Construction
- Operating a Sustainable and Profitable Business
- How to Price Water Feature Projects
- Savio Certified Contractor Program / NAPP
- And Much More!
