## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

## ORNAMENTAL PESTS

MERIT 2.5 G Ornamental Insecticide is for use on ornamental shrubs and small trees in outdoor landscapes and interior plantscapes.

MERIT 2.5 G is a systemic product and will be taken up by the roots and translocated upward within the plant system. Therefore watering after application makes the product more available for uptake.

Systemic activity using this soil application treatment method can be delayed until the active ingredient is translocated throughout the plant. For this reason, applications work best when made prior to pest infestation or before pest populations become severe.

## PESTS CONTROLLED

Aldegids	Leaf beetles (including Elm leaf and Viburnum leaf beetles)
Aphids	Leafhoppers
Black vine weevil (larvae in soil)	Psyllids
