### Distributed by Southern Agricultural Insecticides, Inc.

Palmetto, Fla. 34220 Hendersonville, N.C. 28793 Boone, N.C. 28607 E.P.A. Reg. No. 62719-304-829 J1 EPA EST. NO. 829-FL-1

Net Weight: 9 lb. (4.08 kg.)

PRODUCT FACTS:	Treats up to 60,000 Sq. Ft. (about 1.5 acres)
(ILLS:	Fire Ants
VHERE TO USE:	On Lawns
	Perimeter of Home
	Around Ornamental Plants
	(Flowers, Shrubs & Trees)

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

### **AMOUNT TO USE**

Mounds: 4 Tbs for each mound t

Broadcast Application: 1/2 - 3/4 cup for each 1.000 sq ft

† For mounds greater than 15 inches in diameter use 6 Tbs per mound.

Do not use kitchen utensils for measuring. Keep measuring utensils with pest control products and away from children.

### FOR BEST RESULTS

### **HOW TO APPLY**

Mounds: Sprinkle bait evenly over and around each mound in a 4-ft diameter circle. Apply gently to avoid disturbing

Broadcast Application: Use a hand held or ground driven rotary broadcast spreader.

### MOW

Avoid mowing 1 day before and after application.

### WATER/RAINFALL

Do not water-in bait.

Do not water within 6 hours of a mound or 24 hours of a broadcast application.

If rain occurs within 6 hours of mound application or 24 hours of broadcast application, adequate foraging of the bait may not occur and retreatment may be necessary.

#### WHEN TO APPLY

Apply when ants are active (usually when temperatures are greater than 60°F).

The best time to apply is in the cooler morning and late evening when fire ant foraging is at its peak.

Mounds will usually be eliminated/destroyed in 3 to 14 days. Extremely large mounds may require a repeat application.

Make a broadcast application every other month during the warm months to keep fire ants from establishing/starting/ forming new mounds.

### **HOW IT WORKS**

Payback fire ant bait is attractive and deadly to fire ants. Fire ants quickly find/pick up this bait, take it back to the mound, and feed it to the entire colony including the queen(s). Ants start dying in 24-36 hours with mound/colony destruction in 3 to 14 days. Broadcast applications may take longer.

Fire ant colonies are started by newly mated queen(s) that fly into an area, burrow into the ground and begin laying eggs. Several flights are common during the summer, often shortly after rain. It takes several weeks for new mounds to appear. Combining mound and broadcast applications eliminates/ controls visible mounds and helps prevent new mounds from forming.

### STORAGE AND DISPOSAL

**STORAGE:** Store in a cool dry place out of the reach of children and domestic animals. Store in original container only. DISPOSAL: Do not reuse container. Wrap container in news-
